

MAPESHO MULENDA

Computer Science Student | Aspiring Cybersecurity Professional

Lusaka, Zambia | mulendamapesho@gmail.com | +260974177004 | github.com/0xU53R | [Portfolio](#)

PROFILE

Computer Science undergraduate with a strong interest in cybersecurity, networking, and secure software development. Hands-on experience with penetration testing tools, vulnerability assessment, and building security-focused applications. Quick to learn new tools and technologies, with a problem-solving mindset developed through independent projects and CTF-style challenges.

EDUCATION

Bachelor of Computer Science

National Institute of Public Administration (NIPA) | 2024 – 2029

TECHNICAL SKILLS

Programming: Python, JavaScript, C, C++, Java

Security & Pentesting: Burp Suite, Metasploit, Web Application Security, Penetration Testing, Vulnerability Assessment

Networking & Systems: Linux / Kali Linux, Wireshark, Nmap, TCP/IP, Firewalls, Cloud Security

Tools & Frameworks: Git, Docker, SQL & Databases, MITRE ATT&CK, Compliance & Governance

PROJECTS

File Hash Checker

- Built a Python tool that verifies file integrity and detects tampering using cryptographic hashes.

Net Hunter

- Developed a network reconnaissance and enumeration tool to identify exposed services on a network.

CERTIFICATIONS

- Introduction to Cybersecurity — Cisco Networking Academy (Mar 2026)
- ISC2 Certified in Cybersecurity (CC) — Candidate; exam in progress (expected September 2026)
